

Gas Mixture CREATOR

Software Manager .FREE / .PRO

With Gas Mixture Creator Software you can easily define all the parameters of any of the MCQ Instruments gas mixers.

With a user friendly interface, you can manage all the gas mixing values to create your mixtures and recall them when needed. All products in our catalog have an USB Interface for a painless communication with computers and laptops.

Manage.

Manage the percentage of concentration, each channel.

Set.

Set the total flow dilution or mixing rate.

Check.

Read the flow value for each channel.

Save.

Save and recall your different gas mixtures.

Define.

Define your own multi components gas cylinders.

Customize.

Change K-factor from the listed gases.

Control all the Parameters.

The software Version **.FREE** allows to control all the parameters of the Gas Blenders. Thanks to an user-friendly interface you can manage the mixing process by intervening directly on the single channels to modify and control the final mixtures or dilutions.

Upgrading to Version **.PRO** you will be able to set your supplied particular gas mixture, moreover to create, save and re-call your mixing program.

Specifications.
